**November 16, 2006
Report #: 32184**

Chemical Analysis: Total Lead in Sample/Substrate/Composite

Procedure: Analysis of the sample/substrate/composite was performed by *Inductively Coupled Argon Plasma or Atomic Absorption Spectroscopy* to determine total lead content.

Requirement: There is currently no requirement for total lead content (calculated as lead metal) in substrate/sample/composite. However, the total lead content (calculated as lead metal) in surface coating shall not exceed 600 ppm of the dried paint film as required by **16 CFR 1303**.

Sample ID: Color Wood Samples

Sample Utilized: Coating Removed from Product

Conclusion: When tested as specified, the submitted sample **does comply** with **16 CFR 1303** requirements.
